

REVEAL THE INVISIBLE

Ultraviolet light is more than illumination—it is a gateway to hidden worlds, transforming ordinary environments into extraordinary visual experiences. By revealing fluorescent materials and invisible details, UV lighting adds depth, mystery, and emotion, creating moments that captivate and inspire.

From the energy of live entertainment to the precision of television studios, from immersive artistic installations to spectacular scenic effects, UV light enhances creativity and redefines the way audiences perceive space. It turns clubs and themed venues into vibrant visual landscapes, elevates theatrical productions with striking fluorescent effects, and empowers designers to craft unforgettable atmospheres.

Beyond entertainment, ultraviolet technology also plays a vital role in security and forensic applications, where its ability to expose what remains unseen to the naked eye makes it an indispensable professional tool.

Whether for artistic expression, immersive experiences, or technical precision, UV light reveals what ordinary light cannot—unlocking a new dimension of creativity and discovery.

UV BLACK LIGHT Series

UV-A Performance for Professional Applications

Our professional Black Light LED range is designed for stage, architectural and special effect applications requiring high-performance UV-A illumination in the 365–400 nm wavelength range. Available in multiple fixture formats including Floodlights, Profiles and Downlights, the range offers maximum flexibility for theatrical productions, live events, clubs, exhibitions, themed environments, and artistic installations.

Engineered with advanced LED technology, these fixtures deliver intense ultraviolet output with excellent efficiency, long operating life, and reduced maintenance compared to traditional UV sources.

The optimized optical design ensures uniform coverage and strong fluorescence excitation for scenic, decorative, and technical applications.

FRESNEL | PC | PROFILE

CYCLORAMA

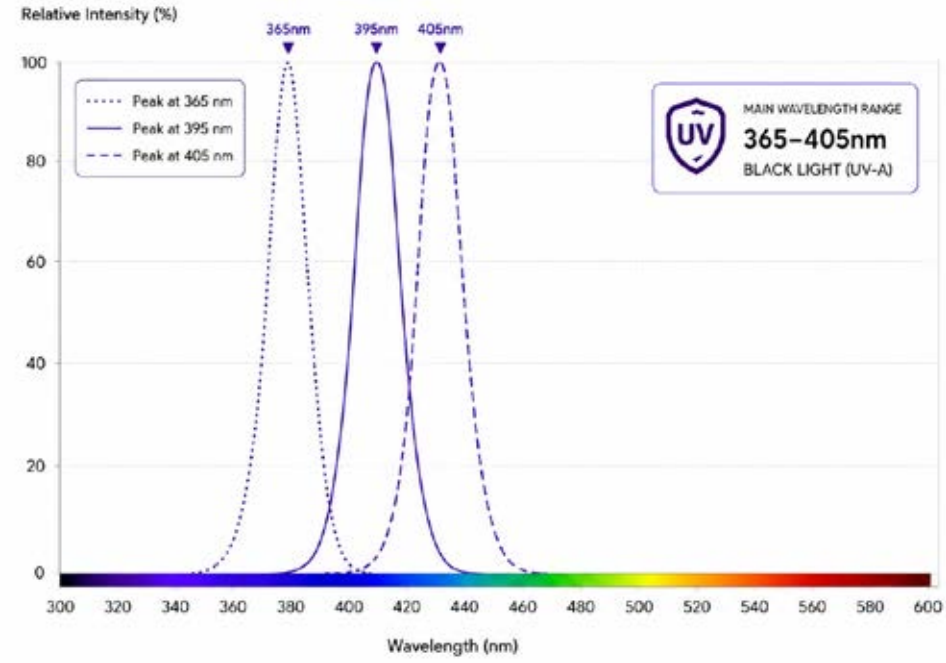

DOWNLIGHT

CUSTOM

THREE **PEAK WAVELENGTH OPTIONS** AVAILABLE

365nm PEAK

Ideal for fluorescent excitation, forensics, security and high-contrast inspections.

395nm PEAK

Optimized for general purpose UV applications and many industrial processes

405nm PEAK

Best for UV curing, bonding, coating and specialized industrial applications

SPOTLIGHT®
professional lighting for the performing arts

Premium lighting since 1969

Spotlight has been designing and crafting professional lighting fixtures since 1969, catering to the world's foremost events and infrastructure. Spotlight's expertise lies in providing illumination solutions for prestigious venues and cultural spaces where light plays a pivotal role in creating captivating and emotional atmospheres.

We take pride in our deep technological know-how, enabling us to create high-performance lighting fixtures with a unique design. All our products are proudly made in Italy, originating from cutting-edge laboratories. Here, a dedicated team of professionals works every day to design and refine projectors that have over the years become synonymous with quality and reliability.

Furthermore, each fixture in our catalog can be customized to meet specific customer requirements, allowing us to bring to life unique solutions that satisfy even the most demanding lighting designers and challenging projects.

PREMIUM FUNCTIONS

We have developed the most requested functions for our lights, accumulated over years of experience and collaborations with the most famous theatres and lighting operators in the sectors.

DIMMING CURVES	HALOGEN EMULATION	OUTPUT FREQUENCY	NOISE MANAGEMENT	BOOSTER
Up to 6 dimming curves	Emulation of halogen lamp	Flicker-free regulation	Up to 3 fan modes	+20% light output

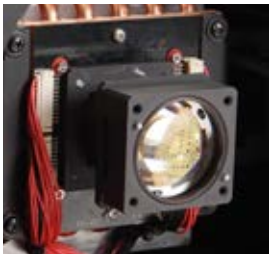

PLUS/MINUS GREEN	LED CALIBRATION	CUSTOM PRESET	SMOOTH DIMMING	STAND ALONE MASTER-SLAVE
Adjustable green component of CCT	Tints color calibrations	LEE / ROSCO filters custom colors	High quality dimming from 100% to zero	Direct control of one or a group of fixtures

TEMPERATURE CONTROL	WORKING HOURS CONTROL	DATA CONTROL	LIGHT WEIGHT HOUSING	ENVIRONMENT
On LED source, Driver and CPU	On the Unit and on each Single Colour	Local, DMX, Wireless-DMX ready and DALI (where applicable)	Aluminum and PolyCarbonate housing	Sustainable manufacturing process

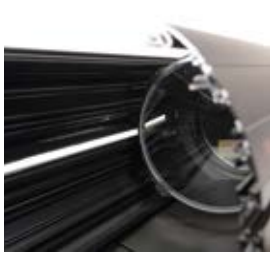

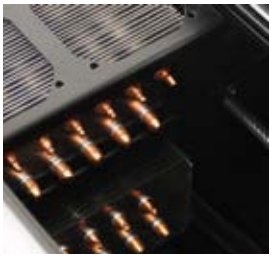

PRODUCT QUALITY & CONSTRUCTION DETAILS

Robust, simplicity and intuitive solutions designed to last for years.

MOV Series

Our motorized yokes are designed to support virtually any professional lighting fixture for theatre and television, including products from our own range as well as those from leading manufacturers. They can also be used with video projectors, fog machines, loudspeakers, and other equipment up to 30 kg.

Designed to preserve the photometric performance of conventional fixtures while adding the flexibility of remote positioning, they significantly reduce setup and focusing time. Available in 2- or 3-axis configurations, the system provides smooth, high-precision pan, tilt, and focus or zoom control via 16-bit DMX.

200W | **300**W | **700**W | CUSTOM

STAGE Series

Since 1969, we have been offering one of the industry's most comprehensive ranges of professional stage lighting fixtures. From **Fresnels**, **Plano-Convex** and **Profile** to **Floodlights**, **Cycloramas** and **Followspots**, the range meets the needs of Theatres, Television Studios and Live Productions.

Engineered for long-term reliability and built to withstand demanding professional use, our fixtures are chosen wherever outstanding optical performance and precise light control are essential to creating impactful visual environments.

SPOTLIGHT
professional lighting for the performing arts

ARCHITECTURAL Series

The Architectural range includes compact, design-focused luminaires developed for accent lighting in museums, cultural venues, places of worship, retail spaces, and showrooms.

Designed to combine discreet aesthetics with high-performance lighting, all fixtures are available for stand-alone installation or mounting on 230V or 48V track systems.

Pin-spots available with fixed beam or zoomable optics, Profiles with double-lens system zoom and shaping shutters.

30W | **50**W | **85**W

UV BLACK LIGHT Series

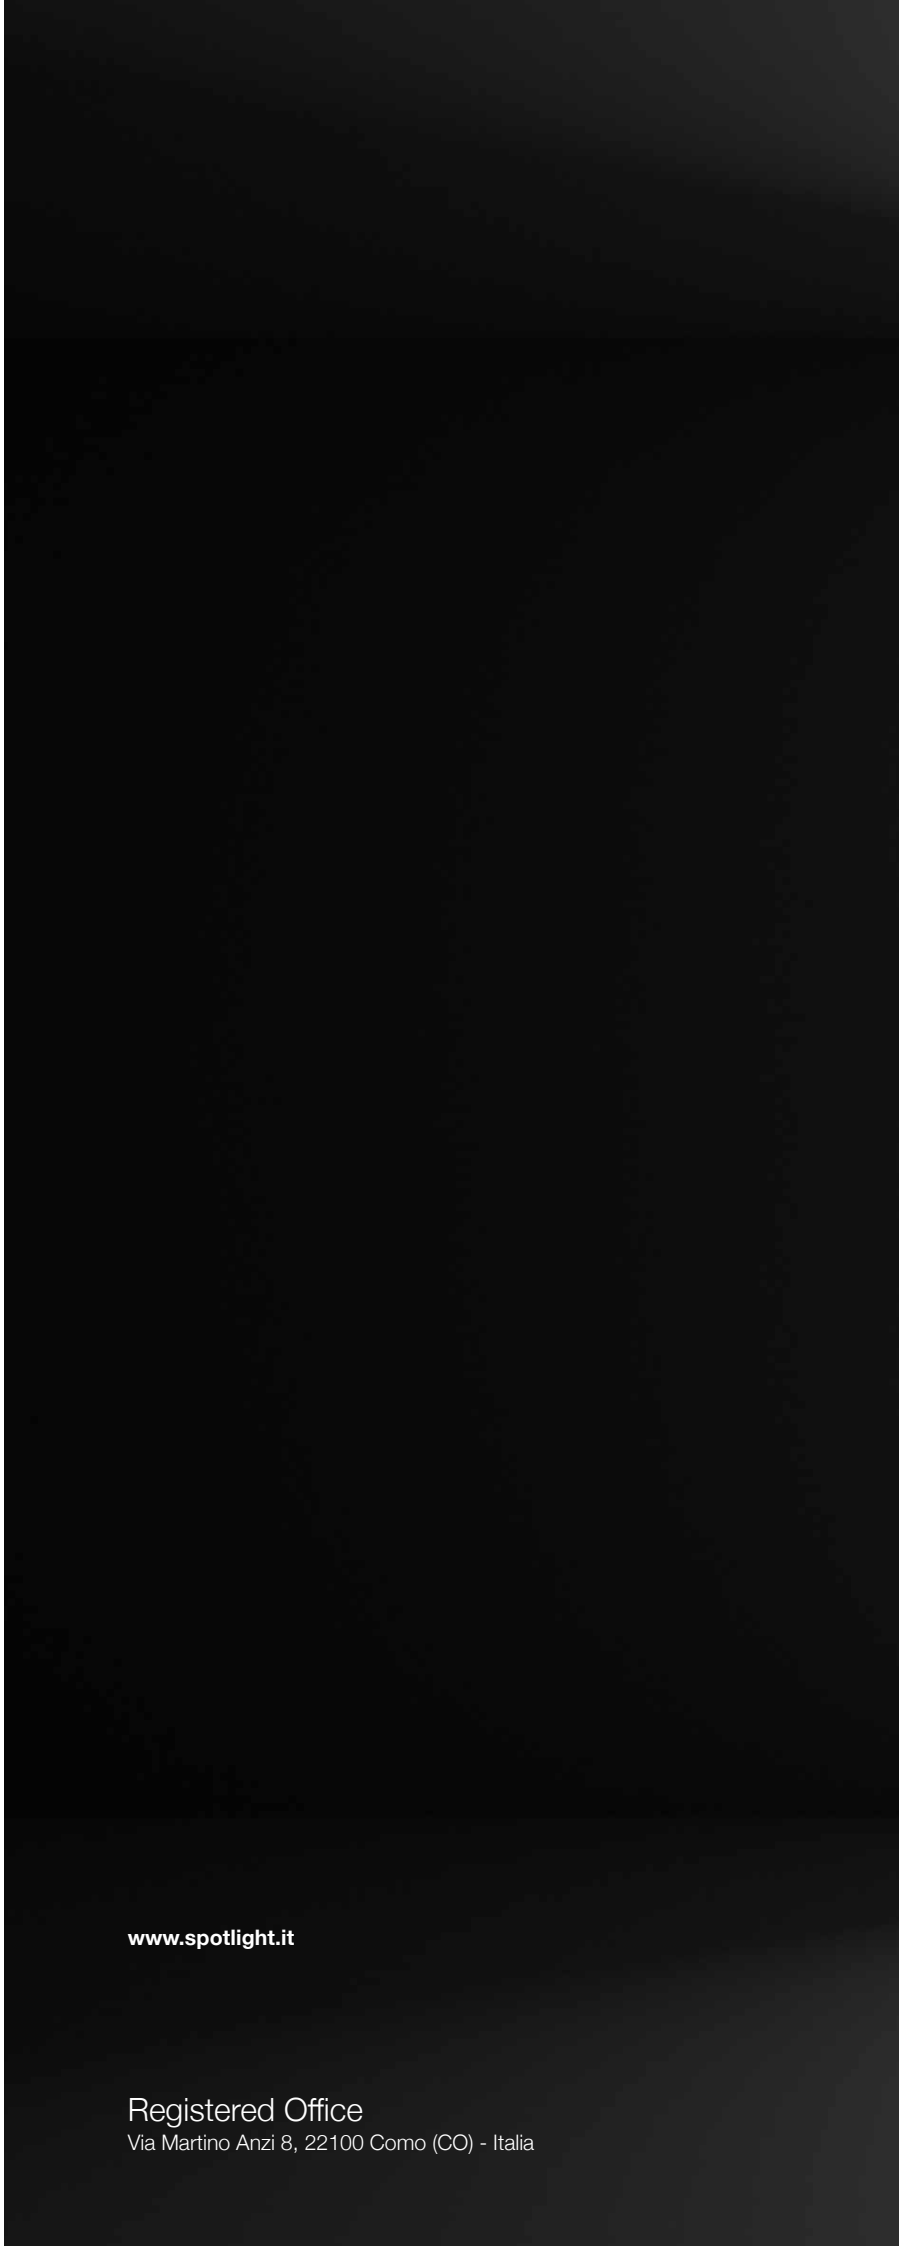

Our professional UV Black Light LED range is designed for stage, architectural, and special effects applications requiring high-performance UV-A illumination in the 365–400 nm wavelength range.

Available as Floodlights, Profiles, and Downlights, the range provides versatile solutions for theatres, live events, clubs, exhibitions, themed environments, and artistic installations.

Engineered exclusively for professional use, all fixtures are manufactured to the highest quality and safety standards and comply with EN 62471:2008 (Photobiological Safety of Lamps and Lamp Systems).
